LEGEND

- Existing well
- KP points
- Tamar existing flowlines
- Tamar existing umbilicals
- Proposed Leviathan Field to Leviathan Production Platform flowlines, umbilicals and pipelines
- Subsea communications cable
- Matchlines 1:50,000
- Earthquakes Geophysical Institue of Israel
- Earthquakes International Seismological Centre
- Earthquakes Jordanian Seismological Observatory
- Strike/slip faults
- Slump faults, ticks denotes downthrown side
- -1420 Depth below sea surface to seabed, contoured at 5m intervals

NOTES

Data sourced from a combination of existing 3D seismic, AUV multibeam and surface multibeam echo sounder

Illuminated from northwest at 45° above horizontal

Seabed feature interpretation limited to within at least 2km of proposed route

CHART SCALE 1:50,000

0 3,750 7,500 15,000 22,500 Feet

0 1,250 2,500 5,000 7,500 Meters

LEGEND

- Leviathan Production Platform (182,052m E / 722,792m N)
- KP points
- Proposed Leviathan Field to Leviathan Production Platform flowlines, umbilicals and pipelines
- Subsea communications cable
- Matchlines 1:50,000
- Shoreline
- Earthquakes Geophysical Institue of Israel
- Earthquakes International Seismological Centre
- Earthquakes Jordanian Seismological Observatory
- Strike/slip faults
- Normal faults, ticks denotes downthrown side
- Regional landslide pathway, debris deposits and several smaller scale normal faults
- -1020- Depth below sea surface to seabed, contoured at 5m intervals

NOTES

Data sourced from a combination of existing 3D seismic, AUV multibeam and surface multibeam echo sounder
Illuminated from northwest at 45° above horizontal

Seabed feature interpretation limited to within at least 2km of proposed route
