

Tres Mesas Wind Project
Summary of Stakeholder Engagement Activity to Date
Frontera Renovable
March 24, 2014 (DRAFT)

Introduction

Frontera Renovable, S. de R.L. de C.V. (“Frontera Renovable”) is currently in the advanced stages of developing the first two phases of the approximately 400 MW Tres Mesa Wind Project in the municipality of Llera de Canales and a small portion of the municipality of Las Casas, State of Tamaulipas (the “Project”). The Project site consists of both Ejido (communal) and private land. Frontera Renovable began engaging Project landowners, Ejido leaders and members, the local community and other stakeholders from the very outset of development of the Project, which began in 2007.

Since 2007, Frontera Renovable has been interacting continually and consistently with Project stakeholders. Frontera Renovable has had an open communication policy with all known stakeholders, in particular, landowners and Ejido leaders involved in the Project. Frontera Renovable has also briefed governmental officials on the Project and collaborated with local, state and federal governmental agencies on the establishment of a path forward during Project development.

During the MIA (manifestacion de impacto ambiental, i.e., environmental impact assessment and report) process, no one filed a request for a formal public consultation process through the lead permitting agency, SEMARNAT.

All known negative impacts related to the Project have been fully disclosed in the MIA. Potential negative impacts have been discussed at both formal meetings and informal discussions that have been ongoing since 2007.

Frontera Renovable is committed to continuing to engage Project stakeholders throughout the life of the Project, including development, construction and operations. Frontera Renovable will implement a Stakeholder Engagement Plan through these Project lifecycle phases. Frontera Renovable is also committed to being a good neighbor and community member throughout the Project’s existence.

Formal Stakeholder Meetings to Date

While many informal discussions have taken place since 2007 with Project stakeholders, both landowners and non-landowners, the following is an outline of the more formal meetings that have taken place (for example, Frontera Renovable has been participating in Ejido assembly meetings as needed and working with landowners on the execution of land agreements related to the Project – during these meetings, information on the status of the Project is always provided):

Ejido “Rancho Nuevo”: An Ejido parcel that is primarily a part of the first phase of the Project.

First meeting	
Date	July 15, 2013
Time	10:00 A.M.
Advertisement method	Meeting arranged by Jesús Xavier Félix
Participants	<p>Ejido “Rancho Nuevo”</p> <ul style="list-style-type: none"> • Juana Morado • Emilio Alcocer • Three community representatives <p>Frontera Renovable</p> <ul style="list-style-type: none"> • Jesús Xavier Félix <p>C3 Consensus</p> <ul style="list-style-type: none"> • Carlos Angulo • Abraham Solís
Evidence	<p>Site visit report from a site visit by C3 Consensus. The site visit had the principal objective to collect the following information:</p> <ul style="list-style-type: none"> • Socioeconomic and demographic hard data collection of directly and indirectly affected communities. • Local Dynamics. • Interviews with people from the region. • Management of information collected so far.
Agenda	<p>Recognition visit to field and contact community personnel.</p> <p>Collect site information to help refine community outreach plan.</p>
Project changes or other items implemented as result	Information about the community expectation was obtained and used to prepare the information workshop/second meeting.
Commitments made	To present the Project to the community in a future meeting.

Second meeting	
Date	September 20, 2013
Time	10:30 A.M.
Advertisement method	<p>Meeting arranged by Jesús Xavier Félix.</p> <p>Invitation to “Ejidatarios” and “Vecinos” made by Comisariada Juana Morado.</p>

Participants	<p>Ejido “Rancho Nuevo”</p> <ul style="list-style-type: none"> • “Ejidatarios” and “Vecinos” <p>Frontera Renovable</p> <ul style="list-style-type: none"> • Jesús Xavier Félix • Fernando Villarreal <p>Vestas</p> <ul style="list-style-type: none"> • Laura Pardo <p>C3 Consensus</p> <ul style="list-style-type: none"> • Carlos Angulo • Thierry Conraud
Evidence	<ul style="list-style-type: none"> • Pictures and video of the meeting. • Surveys to the community. • Results of the applied surveys.
Agenda	<ul style="list-style-type: none"> • Present the Project to the community via a joint-presentation by Frontera Renovable, Vestas and C3. • Apply a survey to the attendants in order to obtain information about their expectations and interest in the Project. • Provided a fact sheet on wind energy and the Tres Mesas Project.
Project changes or other items implemented as result	<p>Creation of local committees which will be the primary points of contact for Project communications and which committees will propose any local community projects that it requests that the Project be involved in.</p> <p>Survey’s analysis to be included in the social base line to define strategies and main actions according to local needs and customs.</p>
Commitments made	Follow Corporate Social Responsibility (“CSR”) program with committees’ activities.

Project Information Available to the Community:

Any non-technical summaries in addition to the MIA are available at the following locations:

- 1) Notaria 306: Chihuahua No. 963 C, Ciudad Victoria, Tamps.
- 2) SEMARNAT Tamaulipas: Matamoros Palacio Federal 2° Piso Col. Centro, C.P.87001, Cd. Victoria, Tamps.

Stakeholder Survey

In order to efficiently and effectively inform the communities about the Project, face to face presentations were made to each of the six Ejido communities as outlined above. These presentations included the following material:

1. Project Description
 - a. Developer and company information
 - b. Field work to date
 - c. Permits obtained to date
 - d. Future field work and permits needed
2. Wind Energy

- a. Wind energy benefits
 - b. Wind turbine generator
 - c. Myths and realities of wind energy
3. Social Responsibility

At the conclusion of each of the presentations, attendees were invited to answer a written survey. If an attendee could not read or write, the survey was presented orally and any answers were committed to writing for the person. The following questions were posed during the surveys:

1. How satisfied are you with the information presented in this workshop?
2. In particular, the information on wind energy?
3. In particular, the information on the Tres Mesas Wind Project?
4. In particular, the information on the social responsibility program?
5. What are the main advantages and/or opportunities you see in the Project?
6. If so, what are the main weaknesses or negative aspects you see in the Project?
7. What are the main issues your community is facing at the moment?
8. What are the main concerns in your house?
9. What area should be a priority for the Project to support the development of your community? (Example: education, health, utilities, etc.)
10. Which of the following sentences is more accurate with your actual perception of the Project?
 - a. I am not satisfied; I don't see it like a good project.
 - b. I am not interested in the project; but I am not against it.
 - c. I don't know; I need more information about it.
 - d. I am satisfied.
 - e. I am satisfied and I want to support it.
11. Why?
12. Please provide any additional comments

The following number of people completed the survey:

- 1) Ejido Rancho Nuevo del Norte:
 - a. 40 people completed the survey
 - b. This represents 30.76% of the total population of the Ejido
- 2) Ejido La Angostura:
 - a. 26 people completed the survey
 - b. This represents 28.88% of the total population of the Ejido
- 3) Ejido San Francisco:
 - a. 25 people completed the survey
 - b. This represents 10% of the total population of the Ejido
- 4) Ejido Emiliano Zapata:
 - a. 53 people completed the survey
 - b. This represents 7% of the total population of the Ejido

- 5) Ejido Compuertas:
 - a. 52 people completed the survey
 - b. This represents 8.2% of the total population of the Ejido
- 6) Ejido Pedro J. Méndez:
 - a. 67 people completed the survey
 - b. This represents 10.78% of the total population of the Ejido
- 7) Other
 - a. 4 people completed the survey

267 total people completed the survey; about 30% of the respondents were women.

The total population in the municipality of Llera is approximately 17,333 people, distributed amongst 242 towns (approximately 47% of which are women). The urban population accounts for approximately 24% of the total while the rural population accounts for approximately 76% of the total. In the municipality of Llera, approximately 33% are under the age of 18, 49% are between 18 to 59 and 18% are 60 and over. (INEGI.2010.Population and Housing Census.)

The municipality of Casas has a total population of approximately 4, 423 people (approximately 49% of which are women). About 37% of the population is under the age of 18, 49% are between 18 and 59 years and 13% are 60 and older. (INEGI.2010.Population and Housing Census.)

The Project includes 6 Ejido communities, the populations of which are listed below and include both Ejidatarios and Vecinos.

Ejido	Population	Ejidatarios
General Pedro José Méndez	621	121
Las Compuertas	629	91
Emiliano Zapata	846	85
San Francisco	250	44
La Angostura	90	39
Rancho Nuevo	130	48

Phase I and II will only be close to three towns: Rancho Nuevo and La Angostura in Llera municipality and San Francisco in Casas municipality.

Overall, the survey revealed a very favorable attitude by the community to the Project. The overwhelming majority of the survey respondents revealed that they see the Project as something that will help their community, especially with respect to job creation and influx of additional revenue to local businesses during the construction phase.

Grievance Mechanism

There is already a grievance mechanism operating within the local Ejido communities. Each Ejido has nominated members to a committee that will be the point of contact with the Project with respect to communications and any potential proposal community projects that the Project is requested to participate in. There is a mailbox in each town hall close to phase I of the Project, and non-landowners living in the Ejidos (Vecinos) can use the mailboxes because they have access to the town hall. These mailboxes are opaque and with restricted access to its interior. A 01 800 free number is available to leave suggestions, complaints or comments about the Project. A small poster is placed near the mailboxes explaining how to fill the grievance mechanism form. The Project website also provides information regarding the company, the Project and a contact submittal form to request additional information: <http://www.fronterarenovable.mx/>.

Non-Landowner Stakeholder Involvement

Beginning in 2007, local businesses have been provided opportunities to gain additional work through performance of services for the Project, including lodging, security, land surveying, project site access improvement, general contracting, etc. Members of the local community have even provided, free of charge, horses to use for access to Project site areas where roads are not available and access is difficult on foot.

Communication about the Project status has been ongoing since 2007 with local, state and federal regulators as well as other governmental officials.
